## Professional Experience

---

**Uber Technologies**, Austin, TX  
*Operations & Logistics Manager*

January 2017 - Present

I work on a City Operations team at Uber and focus primarily on Driver Acquisition and Driver Engagement to ensure our drivers-partners are in a position to succeed and meet the ever-growing rider demand in our markets.

I conduct ad hoc analyses with R and SQL to better understand trends in our business. I balance this analytical rigor with strong operational excellence, and I'm always looking to improve and streamline processes.

Example projects include: Running driver incentives to balance supply and demand in Uber's dynamic marketplace, formulating competitive strategy for Uber's re-launch in Austin following a one-year absence, and using a machine learning model to track Twitter sentiment leading up to our re-entry into Austin

**Ernst & Young**, Dallas, TX  
*Consultant, Financial Services*

September 2014 - January 2016

I worked within the Financial Services Organization of EY to provide global clients a variety of world-class services and improve performance in all areas of their business. I brought an analytical focus combined with superior interpersonal and communication skills to deliver transformational change and help clients solve some of their biggest problems.

## Education

---

**Texas Tech University**, Rawls School of Business  
*Bachelor of Business Administration, Finance*

Graduation Date: May 2014

- 99th Percentile, Bloomberg Aptitude Test
- Presidential Merit Scholarship

## Skills

---
